

Sai Prashanth Lanka

13912 Wainhouse Rd, FRISCO, TX, 75035 * (972)-469-2323 * saip.lanka02@gmail.com

CAREER OBJECTIVE

Highly motivated, goal-oriented college senior with a track record of academic excellence and passion for understanding and exploring new skills and opportunities. Has built communication skills and academic talent through many years of extracurricular involvement and multidisciplinary experiences. Constantly looking for intriguing and challenging opportunities to increase my knowledge and skill set.

EDUCATION

TEXAS A&M UNIVERSITY, College Station, TX (GPA: 3.2/4.0)

Bachelor of Science (B.S.), Major in Electronic System Engineering Technology (Cyber Security), Minor in Computer Science (Graduation May 2025)

- **Relevant Coursework:** CSCE 121, ENGR 102, CSCE 221, CSCE 222, ESET 210, ESET 219, ESET 349
- **Awards & Honors:** Aggies Invent AI - 1st Place, Aggies Invent Vet Science - 3rd Place, TamuHack - 3rd Place, NSF I-Corp – \$5,000 Award

EXPERIENCE

MACYSTECH, Johns Creek, GA

Development/Technology Intern, June 2024 – August 2024

- Increased code coverage for multiple Java-based applications using SonarQube and Jenkins Pipelines. Helped facilitate respective applications for local to GCP Migration. Created multiple Java and JSON test cases and test files and pushed to PROD servers.

WELLMED/UNITED HEALTH GROUP, San Antonio, TX

Development/Technology Intern, May 2023 – August 2023

- Developed filesharing application using ASP.NET to increase team efficiency. Fixed SSIS packages and SQL servers being used to funnel customer data. Managed and resolved tickets to help multiple teams and projects move forward.

CEPHEID, San Francisco, CA

Project Management and Governance Intern, May 2022 – August 2022

- Successfully executed, manage, maintain, govern and report on key business-focused IT projects to ensure they are delivered on time, under budget and within scope. With the addition of a PMO Project Coordinator, this can help ensure our goals are met and the Project Manager is successful.

LAK TECHNOLOGIES LLC, Frisco, TX

Cloud Resources Intern, Jan 2019 - Jan 2022

- Installed application on AWS EC2 instances and also configured the storage on S3 buckets. Communicate various consultants to increase and maintain relations and resolve issues. Generated and issued timesheets for IT consultants.

SKILLS/CERTIFICATIONS

Certifications -

Full Stack Developer Certification, AWS Cloud Practitioner, Machine Learning Certification, ASP.NET Certification

Languages -

Java, Python, C++, C#, C, SQL, HTML/CSS, React.js, JavaScript, Swift, Assembly

Tools/IDEs -

Visual Studio/Visual Studio Code, SSIS, Google API, MATLAB, Pandas, Microsoft Office, Data Structures, ServiceNow, Control-M, Firebase, AWS, GCP, GITHUB, GITLAB, SonarQube, Jenkins, PostMan, XCode

PROJECTS

File Sharing Software -

Developed filesharing application using ASP.NET for team use to increase efficiency. Allowing people with permissions to force file share with out Control-M request.

SafeStreets -

Designed and built a web app which generates map directions routed away from high violence/crime areas using Python, HTML/CSS, Javascript, Ubuntu Servers, Swift, and Google APIs.

SmartBets -

Designed and built a web app called SmartBets which is a community-based application that allows students to post startups and receive sponsors and product help. The web app was built using Python, JavaScript, React.js, and Firebase.

MedBand (NSF I-Corps Program) -

Formulated personal cardiovascular medical innovation and application. Furthered research on medical innovation, as well as reach out to potential consumers and market to improve innovation. Awarded \$5,000 to further research and join related opportunities.

AI-based Farming -

Built and prototyped an AI-powered Hydroponic Farm using variety of sensors and meters to automatically meet plant needs. Technologies used for this includes 3d Modeling software, Python, and Swift.

FTC Robotics Tech Manager -

Led build and code team as the Tech Manager and built robot to complete certain game tasks using Python, AutoCAD, and mechanical engineering techniques.
